Mode (maximum transparency while still listening to your content), that can be easily toggled between. You can also create custom listening modes in the Bose Music app to fit the mood and moment. See individual product information for details and find your perfect pair of headphones.

A Bluetooth connection is all you need to quickly pair and enjoy your Bose headphones without cumbersome wires. However, we’ve also provided an optional audio cable with our headphones for situations that require a hardwired connection. No matter what you’re doing, you can connect your wireless headphones even without a Bluetooth connection, allowing you to always have the option to be wired to bold Bose sound.

Shop Bose headphones built for every moment

Headphones are more than just a way to listen — they’re an essential part of how we work, move, and connect. At Bose, our headphones collection features the latest innovations in wireless audio, designed for people who value premium sound, comfort, and functionality. Whether you’re commuting, working from home, traveling, or diving into your favorite playlist at the gym, there’s a pair of Bose headphones built for your lifestyle.

Explore a wide range of headphone types

Noise cancelling headphones

Our headphones category includes a variety of options to meet different listening preferences. You'll find industry-leading [noise cancelling headphones](#) engineered to block out distractions and create immersive listening environments. These are perfect for busy professionals, frequent flyers, or anyone who needs peace and focus while working or traveling. Bose’s advanced noise cancellation works by using built-in microphones to detect external sounds and then producing opposite frequencies to cancel them out, giving you a quieter, more focused experience.

Bluetooth and wireless headphones

Looking for flexibility and convenience? Our headphones feature intuitive touch controls, making them a favorite for student athletes. Simply turn on your Bluetooth headphones, open your cell phone, and you’re ready to go. You’ll be connected within seconds. Most models also support [Bluetooth](#) pairing in the future.

Many of our headphones also support [spatial audio](#) for immersive music, movies, and podcasts. And with a magnetic charging case, you can move around your home or office without d

Built for everyday environments

We know your lifestyle is busy, which is why our headphones are designed for all-day wear. Lightweight materials and ergonomic design ensure headphones stay comfortable and reliable even on long flight. Select models are also engineered for outdoor workouts and unpredictable we

Care tips for long-term performance

To keep your headphones performing like new, store them in their protective case when not in use, avoid overexposure to heat, recommended cable and voltage. Regularly cleaning the earbuds can extend their life and maintain comfort. If you need more information, see [how to clean your headphones](#).

When you shop from Bose, you're bound to find the perfect pair. On all orders, our price match guarantee if you find a lower price. Make sure you’ve found the perfect fit.

Start Your audio upgrade today

Ready to upgrade your audio experience? Explore our full collection of Bose headphones and find the perfect match for your lifestyle. Before making a selection, consider how and where you'll use them most. Will you be connecting primarily to a phone or tablet? If so, Bluetooth headphones with multi-device pairing might offer the convenience you need. Are you often in noisy environments like airplanes or shared workspaces? In that case, noise cancelling headphones can help you focus and find calm. And if you plan to wear them during workouts or high movement activities, you'll want a lightweight, sweat-resistant model built for stability and comfort.

**Testing conducted by Bose in April 2025 using production-representative Bose QuietComfort Ultra Headphones and a variety of music tracks using A2DP Bluetooth audio streaming at RSSI signal strength of -75dBm. Volume set to playback loudness of 75dB, 3-band EQ set, to zero in Quiet Mode (full noise cancellation). With Immersive Audio off, playback time was up to 24 hours before battery depletion. With Immersive Audio on, playback time was up to 18 hours before battery depletion. Battery life varies based on settings and usage.*

**Testing conducted by Bose in June 2023 using production-representative Bose QuietComfort Ultra Headphones and a variety of music tracks using A2DP Bluetooth audio streaming. Volume set to playback loudness of 75dBSPL, 3-band EQ set to zero, in Quiet Mode (full noise cancellation). With Immersive Audio off, playback time was up to 24 hours before battery depletion. With Immersive Audio on, playback time was up to 18 hours before battery depletion. Battery life varies based on settings and usage.*
